

## **Homework Assignment 1: Reflections, ideas, and planning**

1. idea for apps:

- social networking app for people who want to find partners for their start up.
- stopwatch that can stop by pressing volume button.
- carpool app for student

2.

suggestion for compensation:

- setting up a patreon with a promise of maintaining and making the app better in the future
- most of the features would be free of charge but when app move up more advance, users can pay a little bit of a fee for premium features. However it won't be really bias that users feel like force into getting premium

3.

- Air bnb: the app is easy to navigate. After searching where to stay, you can see the price on every result. They also have filter for deep searching.
- Facebook: it is very clean. Users can just open it up and scroll down for new feed. every group age can use it. I haven't heard anyone complaining that it is hard to use
- YouTube: YouTube layout is simple enough that a five year old baby can use it.

4. yes I have some idea what to build but still need a little more time to decide
